ECSE365L – Agile Software Engineering Lab 01 – Why Agile?

This is an introduction lab where you have to find the reasons why industries tend to follow the agile approach for software development via tools. Following are your tasks:

- Identify at least six tools and their features that are utilized in the agile software development process.
- Compare two tools from the listed set and select a better option out of two with justification for choosing that specific tool.

Submit an MS Word file that contains your analysis as your assignment.
